advangeo® Software Solutions

The advangeo® product family incorporates the experience of many years of geo-scientific and geo-economic software development.

The following advangeo® products are available:

- **advangeo® Field Cap** is designed for field data capture using mobile devices and communication with a centralised server database.
- **advangeo® Geodata Database** is a GIS and database system for storage, management and distribution of a wide variety of mining, cadastral, geological and spatial data.
- **advangeo® 3D Database** is a raster based system for storage of big 3D data volumes in a product neutral database.
- **advangeo® Prediction Software** is an innovative data mining software using artificial intelligence for the prediction of spatial events/phenomena, incl. exploration targeting & geohazard prediction.
- **advangeo® 3D Prediction Software** enables to create artificial neural networks based predictive models with 3D voxets for 3D exploration targeting & geohazard prediction.
- **advangeo® GIS** is a customised GIS application linked to the other advangeo® products for visualisation of spatial data using either Esri ArcGIS or SharpMap.
- **advangeo® Online** is a web based user interface for both spatial and thematic data.
- **advangeo® eCommerce** is a web-based sales portal for any kind of geoscientific datasets. It is linked with advangeo® Online.
